

**The Islip Environmental Council (ITEC)** funded a project, which will place 1,000 medallions on storm drains throughout the Town of Islip. Last year, members of the Islip Town Board placed the first medallion on a drain that empties into the Great South Bay. The medallions are designed to educate the public about dumping toxic materials down storm drains. For more information, please contact the Department of Planning and Development at (631) 224-5450.
