**PIN 0809.47
SIGN STRUCTURE REPAIR CONTRACT
VARIOUS LOCATIONS
VARIOUS TOWNS
NASSAU AND SUFFOLK COUNTY**

Dear Supervisor Carpenter:

This letter is to inform you that the subject New York State Department of Transportation (NYSDOT) project, PIN 0809.47, Sign Structure Repair Contract at various locations in various towns of Nassau and Suffolk Counties, has now entered the design phase of its development.

PIN 0809.47 was initiated to repair or replace deficient overhead sign structures. The structural damage includes cracked welds, severe corrosion of critical elements, and posts that have been compromised after being struck by errant vehicles. Also, worn or damaged overhead guide signs will be replaced. The new signs will have high retro-reflective sheeting for better visibility at night. This will promote and support safe and efficient movement of vehicular traffic by providing motorists with essential information. A location map with table is included for your reference.

The anticipated letting is tentatively scheduled for the winter of 2015 with an estimated construction start in the spring of 2016.

We would appreciate your assistance in addressing community concerns or conflicts by sharing this information with key business and community groups in your district.

If you require additional information or have any questions, please contact the Project Manager, Vinicio Lora at 631-952-6661. Thank you for your support regarding this matter.

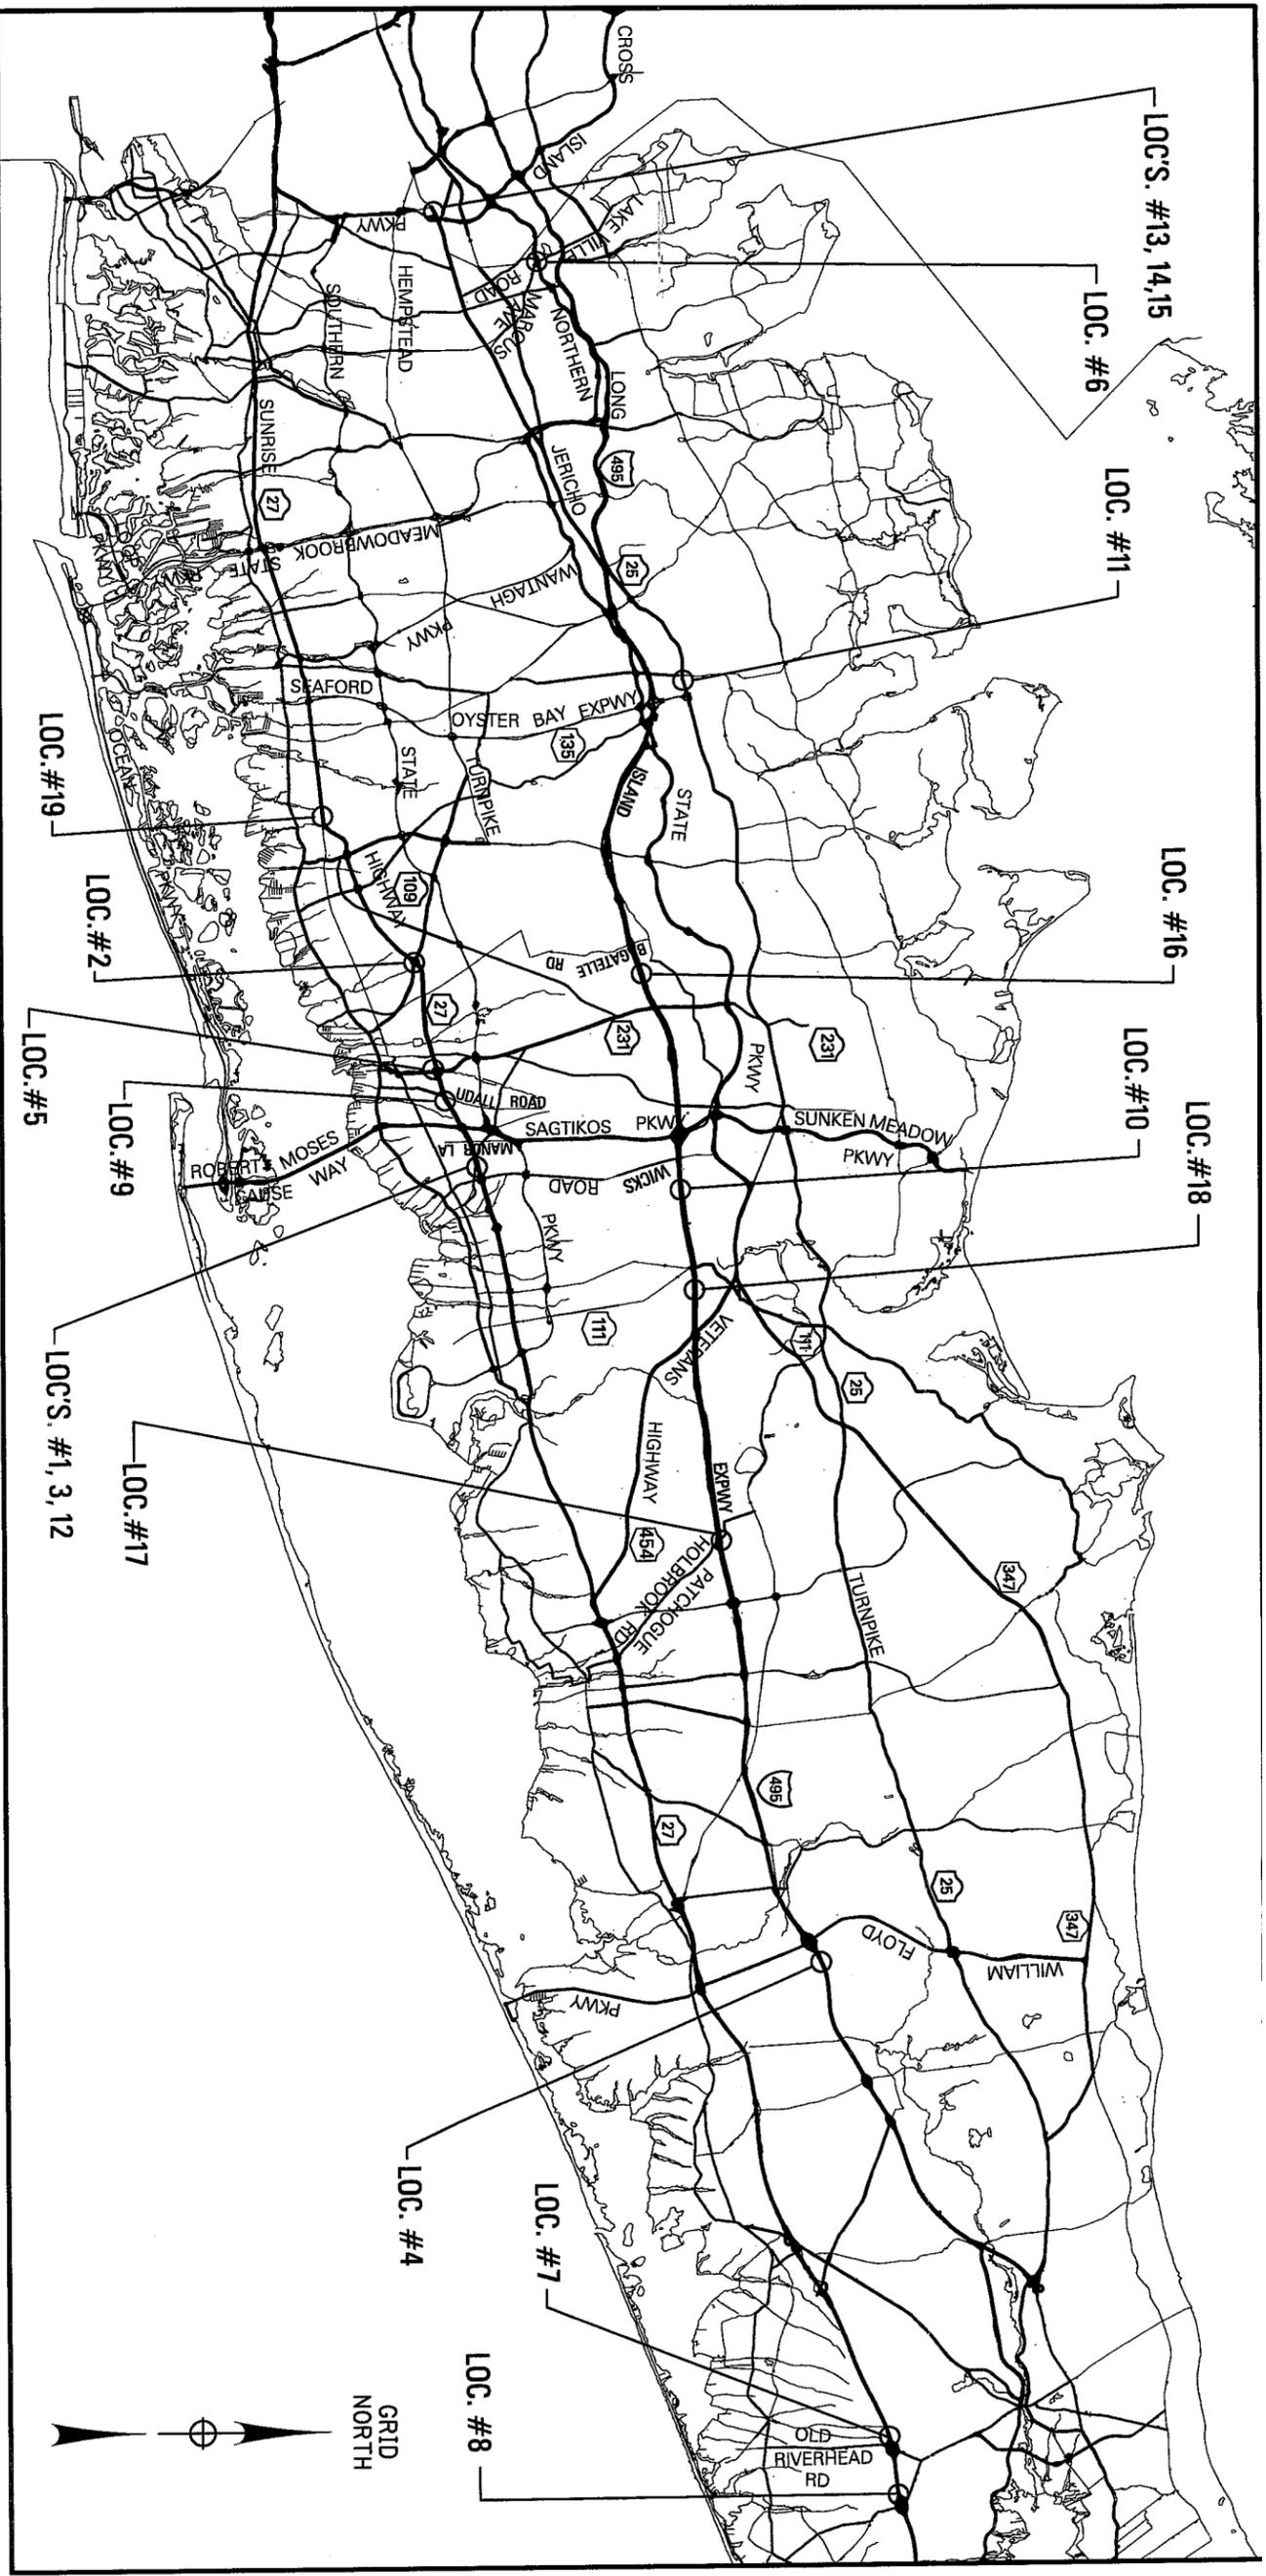

Sincerely,

Mark Bocamazo, P.E.
Regional Design Engineer

Enclosure
